Produkujemy dla branży:
CCTV
automatyki
profesjonalnej telewizji

Dear Sir/Madam,

Camsat, the producer of video and audio transmission systems is interested in cooperation with the Film Spring Open Foundation and Cinebus - a complex vehicle used for film production. For three years, we have been a Technological Partner of Cinebus and events organized with its help.

The idea of Selfie TV is a future-oriented, innovative solution that can be used to handle large events and which will allow using Cinebus' application and infrastructure to transmit edited materials from mobile phones to the Internet or large screens.

Yours sincerely

Gralak Przemysław
