## LETTER OF INTENT

We fully support the initiatives of the Film Spring Open Foundation, as they are pioneering and essential for the future of the audiovisual industry. Modern education, combining art, programming, and the latest technologies, is a crucial tool for the development of both young talents and experienced professionals.

As Lenovo, a company operating in the field of cutting-edge technology, we recognize the great potential of this collaboration. Our joint efforts will contribute to the widespread adoption of new technologies and the latest hardware solutions among AV creators.

We eagerly look forward to collaborative projects that will shape the future of education and drive the development of the audiovisual industry.

Kind regards,

Paweł Dybowski
