LETTER OF INTENT

Panavision is pleased to express our willingness to collaborate with the Film Spring Open Foundation, whose innovative educational program has been supporting the development of both young creators and professionals in the audiovisual industry for 20 years.

Film technologies are constantly evolving, and access to modern equipment and practical knowledge is crucial for the future of the AV industry. The Film Spring Open Foundation offers a unique educational model that combines theory with hands-on experience, allowing participants to work with professional equipment in real production conditions.

We value initiatives that help filmmakers and technicians develop their skills, which is why we support this project by providing equipment for participants' practical training.

Best regards,

Piotr Hermanowski

P. Hermanowski
Dyrektor Techniczny
