LETTER OF INTENT

2025-02-10

We express our willingness to collaborate with the Film Spring Open Foundation, which has been effectively supporting the development of audiovisual education for years through innovative teaching methods. We have long provided both technical and substantive support for the educational programs offered by Film Spring Open.

The rapid advancement of technology in the AV industry requires a new approach to education, one that combines theory with practice. The Foundation's educational program successfully addresses these challenges, enabling both young creators and professionals to acquire new competencies.

We value initiatives that not only expand knowledge but also inspire the creation of modern and sustainable film productions. We are ready to support this process with our expertise, experience, and technology.

Marcin Tkaczyk,

Sales Manager Pro AV
